

Power Play®- Now is the time to set Minimum Revenue for 2020

Action! RPowerD Power Plays are calls to action. This publication is to help agents communicate, quote, and execute 2020 policies that will cover the estimated cost of production right now. 2020 corn prices have hit the targets we have talked about for months. Now is the time to deliver the value and service that will differentiate your agency from others.

| | 2020 RPowerD | | RPowerD Market | | | | Minimum |
|------|-------------------|---|---------------------|---|-------------------|---|--------------------|
| | Coverage Level | | Price as of 5/31/19 | | Approved Yield | | Revenue Trigger |
| Corn | 85% | X | \$4.2075 | X | 165 | = | \$590 |
| Corn | | Х | | X | | = | |

We have two recommended strategies. Both use the 85% RPowerD coverage level. This is intentional, because regardless of the RP coverage bought in 2020, the producer will be well served by adding SCO, ensuring no gap in coverage.
